Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

Step 1: Submission Checklist

S. No	Item to Submit	YES	(Yes / No)
1	Complete source code (all files and folders)	YES	
2	README / Setup Guide (instructions to run the project)	YES	
3	requirements.txt / package.json / dependency file	YES	
4	Database schema / seed files (if applicable)	YES	
5	Environment configuration file (.env.example similar)	YES	

6	Deployed application URL (if hosted)	https://voice-based-concept-understanding-analyser-opdgagardapptgyapkz.streamlit.app/
7	APK / Executable binary (if applicable for mobile/desktop apps)	NA
8	Dockerfile / Containerization config (if applicable)	YES
9	Test files and test results	YES
10	Demo video or walkthrough (if required)	https://drive.google.com/file/d/1P''eMJKoa6WT9HWGJKanaKMGO4tmNKhZH/view?usp=drivesdk

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

 .devcontainer	2 hours ago
 1.Brainstorming & Ideation	1 hour ago
 2.Requirement Analysis	1 hour ago
 3.Project Design Phase	1 hour ago
 4.Project Planning Phase	1 hour ago
 5.Project Development Phase	1 hour ago
 6.Project Testing	1 hour ago
 7.Project Documentation	1 hour ago
 8.Project Demonstration	1 hour ago
 VBCUA project	2 hours ago
View all files	

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	https://voice-based-concept-understanding-analyser-opdgagardapptgyapkz.streamlit.app/
Login Credentials (Demo)	[Provide demo username and password for evaluator access]
Platform / Hosting Provider	[e.g., Render, Vercel, AWS, Heroku, Azure]
Repository Link	https://github.com/dedeepyasriguttikonda-beep/voice-based-concept-understanding-analyser.git
Demo Video Link	https://drive.google.com/file/d/1P”eMJKoa6WT9HWGJKanaKMGO4tmNKhZH/vie”?usp=drivesdk

Step 4: Run Instructions

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Pre-requisites:

- Python 3.9 or higher
- pip (Python package manager)
- Git
- Microphone (for voice input)
- Internet connection (for speech recognition)

Step 1: Clone the repository

Step 2: Navigate to the project directory

Step 3: Install dependencies

Step 4: Copy environment file and update if required

Step 5: Run the application

Step 6: Open your browser

Step 7: Allow microphone access, speak a concept and get the analysis result.

Default Admin (if any future admin panel is used):

- Username: admin
- Password: admin123

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Speech recognition accuracy may decrease in noisy environments	Use in a quiet environment and speak clearly.
2	Requires stable internet connection for Google Speech Recognition API.	Ensure active internet connection.
3	Currently supports only English language input.	Multi-language support will be added in future update
